SUMMARY

Senior AI Engineer, GenAI & RAG Architect, and Full-Stack Technical Leader with 12+ years of experience architecting secure, production-ready enterprise platforms spanning generative AI, retrieval-augmented generation, cloud infrastructure, and full-stack engineering. Skilled at connecting enterprise data to LLMs through hybrid search, vector embeddings, agentic workflows, and MCP servers to build trusted knowledge experiences backed by secure APIs. Brings a track record of architecture governance, hands-on delivery, cross-functional mentoring, and dependable production operations across AI, cloud, and web platforms.
